# **Bond Market Insight**

# High risks and negative anticipations

Ukraine remains under the pressure of negative anticipations caused by high yields and highly limited access to financing. The further depreciation of the hryvnia and significant decline in FX reserves caused a significant hike in domestic bond yields.

**Domestic bond market.** Banking sector liquidity significantly recovered following month-end tax payments at the end of October. Although the broader liquidity indicator rose above UAH50.0bn last week, rates remained high and the KyivPrime ON interest rate rose to 10.0% yesterday, just 50bp lower than it was at the end of October.

Moreover, as the primary auctions failed to attract market demand, the MoF only has domestic QE support to finance the state budget deficit and expenditures, as exemplified last week by the two unscheduled auctions to attract UAH1.95bn of financing. The NBU increased its portfolio by UAH0.97bn.

**Eurobond market.** Although Ukrainian Eurobond YTMs slightly declined following the conclusion of Parliamentary elections at the end of October, spreads widened once more and benchmark yield also rose last week, causing the yield curve to move above 11.0%. The dubious ceasefire in eastern Ukraine, rampant rumours of Russian support of the separatists, depleting FX reserves, and a possible postponement of IMF loans are ongoing investment risks.

# Market update and news

#### Domestic bond market

#### Liquidity slightly increased due to injections

Liquidity recovered after falling at the end of October After month-end tax payments were made at the end of October, banks' correspondent accounts with the NBU fell to UAH24.18bn on 31 October, but rose with low support through last Friday by UAH9.14bn to UAH33.32bn. The NBU continued to absorb extra liquidity via CDs: total CDs outstanding recovered to above UAH15.0bn after slightly declining at the beginning of November (see the left-hand chart below). At the same time, the MoF made large debt repayments which were refinanced via domestic QE support (see comments below).

The NBU issued large loans and purchased several new bonds During the first business week of November, the NBU increased its ON loans by UAH1.19bn to UAH1.34bn last Friday, while it issued UAH1.90bn of 51-day notes to 14 banks last Wednesday. At the same time, the NBU increased its government bond portfolio by only UAH0.97bn but still contained more than 70% of the total domestic debt in its portfolio (see comments below).

#### Chart 1. Banking sector liquidity (UAHbn) (last 3 months)

11-Aug 24-Aug 6-Sep 19-Sep 2-Oct 15-Oct 28-Oct 10-P Sources: MoF, NBU, Investment Capital Ukraine LLC.

Debt repayments should be mostly refinanced (UAHbn)
CDs redemption Debt repayments the NBU loans repayment

Chart 2. Future redemptions of CDs and UAH state bonds

UAH5.74bn in CD redemptions (excluding yesterday's repayments) and UAH2.16bn in local currency debt repayments are scheduled this week. While we do not anticipate that these funds will significantly increase banks' correspondent accounts with the NBU, the CD redemptions should be refinanced by the NBU while the MoF repayment should be partially received by banks. Debt repayments could be refinanced using domestic QE, while part of funds could be received by the NBU as the largest bondholder.

#### Last week's primary auctions

The MoF held auctions three times last week to refinance debt repayments... Of the three primary auctions held last week, only last Tuesday's was originally scheduled. However, as it attracted no demand and was cancelled and had to repay UAH1.86bn on Wednesday (of which UAH1.72bn was in local currency), the MoF fulfilled these repayments and held two additional auctions last week to replenish the funds. ...selling two bonds to receive UAH1.95bn of proceeds The MoF offered a 2-year bond last Thursday for which it both received and fulfilled two bids for UAH936.0m at 16.52% for a total UAH936.41m in proceeds. The following day, it offered a 10-year bond which attracted one bid for UAH1.0bn at 15.50%. In sum, the MoF collected UAH1.95bn of budget financing, fully covering last week's debt repayments.

As bids were submitted at low interest rates for large volumes, the auctions most likely were supported by domestic QE, as has been the routine over the last few months.

#### **Bondholders' structure**

The NBU holds 70% of domestic debt The NBU increased its portfolio many times at the end of October, pushing its share in total bonds outstanding to 70.48% on 31 October. However, last week, due to the increase in non-residents' and banks' portfolios, which most likely occurred as a result of the hryvnia's devaluation, the NBU's share slightly declined to 69.63% last Friday. The non-residents' share is steady at about 5.0% as other residents' hold less than 4% of total bonds outstanding. The banks' share has been slightly above 21% since October. For details, please see the charts below.

#### Chart 3. UAH state bondholders' portfolios (last 3 months)

Notes: other residents' and non-residents' data is plotted against the right-side axis, all other groups of bondholders are plotted against the left-side axis. Sources: National Bank of Ukraine, Investment Capital Ukraine LLC.

#### The NBU's portfolio amounts to UAH278.62bn

The NBU purchased UAH0.97bn of bonds last week, an insignificant volume relative to its UAH278.62bn portfolio. The significant weakening of the hryvnia caused slight volatility in shares, as mentioned above.

#### **Eurobond market**

#### YTMs increase slightly

Yields rose last week due to spreads widening and the benchmark yield rising After a significant spread tightening and decline in yields at the end of October, spreads slightly widened last week and have remained mostly steady at about 890-2,100bp (depending on bond maturity) since last Thursday. The most risky bonds are the ones with the shortest maturity (those with redemptions next year). At the same time, the recent increase in Ukrainian Eurobond YTMs was also caused by the rise in US Treasury bond yields. As of mid-October, the 5-year US Treasury yield was about 1.40%, which rose to 1.68% last Thursday, and then slightly declined last Friday.

## Chart 4. Breakdown of government bondholders (07 November, 2014)

Sources: National Bank of Ukraine, Investment Capital Ukraine LLC.

#### Chart 5. YTMs of some Ukrainian Eurobonds

#### Chart 6. Ukrainian Eurobonds spreads

Ukrainian Eurobonds are highly dependent on both US Treasury yields as well as Ukraine's economic and geo-political developments. The lack of positive news and high anticipations of negative outcomes for debt restructurings are the main risks that concern investors.

#### FUIB to restructure its Eurobonds

FUIB has offered its bondholders to restructure its US\$252m 11% bond due December 31, 2014. As anticipated, the bank's proposition followed Eurobond restructurings offered by other companies that belong to SCM Group.

If agreed upon at the special meeting, bondholders will be able to exchange their notes for a new 4-year series which will mature in December 2018 and a 10-15% redemption. The bondholders' meeting has been scheduled on November 27.

Although the Eurobond debt amounts to 9.8% of the bank's total 3Q14 liabilities, the current FX deficit in Ukraine makes significant outflows of foreign currency very unfavourable.

# **Appendixes**

The following pages contain tabular information on the local fixed-income market. There are tables that detail government debt repayments such as a weekly schedule for current year and quarterly schedule for next 5 years.

Table 7. Foreign-currency debt\* (Eurobonds and loans) repayments for the upcoming 5-year period

Notes: [\*] debt redemptions include also interest payments; debt comprises Eurobonds, IMF and VTB loans; IMF loan is meant all tranches received in 2008-10; [1] redemption of US\$2bn loan to VTB is a worst-case scenario within this loan agreement, it may be prolonged 2 times and this in effect may shift the redemption to 4Q11 or 2Q12. Sources: Ministry of Finance, IMF, Bloomberg, Reuters, Investment Capital Ukraine LLC.

# Glossary

The following is the list of terms, phrases and abbreviations that are frequently used in this report's weekly publications.

**Average duration**, or interchangeably, **bond auction average duration**: Duration calculated from all cash flows obtained from the bonds sold at the auction. Yield-to-maturity, price, and each cash flow (coupons and principal) are calculated on a per-bond basis.

**Average yield**, or interchangeably, **bond auction average yield**: A yield-to-maturity calculated from all cash flows obtained from the bonds sold at the auction and versus the total price paid per bond to acquire them. Price and each cash flow (coupons and principal) are calculated on a per-bond basis.

Basis point, or interchangeably, bp: One-hundredth of a percentage point, or 0.01%.

BoP: Balance of payments.

**Certificate(s) of Deposit**, or interchangeably, **CD(s):** Short-term money market instruments that allow the NBU, the central bank, to absorb excess liquidity from the local banks. Their durations are 2, 3, or up to 5 days; two weeks; one month; 1.5 months; two months; and up to three months.

**CDS:** A Credit default swap; a contract that references the performance of a loan or a bond (sovereign, corporate, or municipal). A CDS is normally quoted in basis points, or hundredths of a percent.

**CRA:** Credit rating agency. These include international industry majors Moody's, Standard & Poor's, and Fitch. It could refer also to other credit rating agencies, including Credit-Rating of Ukraine.

**EFSF:** European Financial Stability Facility (http://www.efsf.europa.eu), created on 9 May, 2010 by the euro area member states, as a Luxembourg-registered company owned by Euro Area Member States (EAMS), which has a mandate to lend to the EAMS in times of difficulty, e.g., in bail-outs. For the purpose of its operations, the EFSF is able to issue bonds EAMS-guaranteed for up to €440bn. Thanks to its structure of credit enhancements, including a cash reserve and a loan-specific cash buffer<sup>1</sup>, the EFSF has top credit ratings from major CRAs: 'Aaa' by Moody's, 'AAA' by S&P, and 'AAA' by Fitch.

MoE: Ministry of Economy of Ukraine (http://www.me.gov.ua).

MoF: Ministry of Finance of Ukraine (http://www.minfin.gov.ua).

NBU: National Bank of Ukraine, the central bank of Ukraine (http://www.bank.gov.ua).

**Party of Regions**, or interchangeably, **PoR:** The *de facto* ruling political party in Ukraine currently. It won the presidency in the February 2010 presidential elections with a slim margin over Yulia Tymoshenko's Bloc, then consolidated power in the parliament, where it has a majority over minor loyal factions, while incapable of forming a majority itself. The next elections for Parliament and the president's office are expected to take place in 2012 and 2015, respectively.

<sup>&</sup>lt;sup>1</sup> For instance, in order to lend €17.7bn to Ireland, the EFSF has to raise around €26.5bn from the financial market.

Percentage point, or interchangeably, ppt: one percent, 1%.

**Recaps**, or interchangeably, **recapitalisation bonds:** Local-currency bond(s), representing a general financial obligation by the government on par with other government's financial obligations, which was/were issued with the purpose of recapitalising state-owned entities like Naftogaz of Ukraine, commercial banks from Ukreximbank to Oschadbank, and the State Mortgage Institution (SMI).

**UAH:** Ukrainian national currency, the hryvnia.

**UAH TWI**, or interchangeably, **hryvnia trade-weighted index:** Index of the local currency calculated by Investment Capital Ukraine (ICU), which is calculated upon nominal exchanges rates to the US dollar and headline consumer price inflation indices of Ukraine and its 26 trading partners, which as a whole, comprise a 76% share of merchandise trade turnover. Please refer to *ICU Quarterly Report* "Ukraine's See-saw Puzzle" published on 14 July, 2009 for more details on the methodology of the index. There are nominal and real UAH TWIs, the former based on exchange rates, and the latter based on both exchange rates and inflation. There are monthly and daily UAH TWIs, which are tracked by ICU. Monthly TWI calculation is based on the monthly data for inflation and trade statistics as well as monthly average exchange rates. Daily TWI calculation is based on the monthly data for inflation and trade statistics; however, its core substance is to reflect daily movements of the exchange rates of Ukraine's currency as well as of its key trading partners.

**UAS:** Ukrainian accounting standards.

**VATs**, or interchangeably, **VAT bonds**: Local-currency bond(s), representing a general financial obligation by the government on par with other government's financial obligations, which was/were issued in accordance with the government's initiative to offload the government's accumulated arrears on VAT refunds to domestic exporters.

Weighted-average duration, or interchangeably, bond auction weighted-average duration: Duration calculated from all cash flows obtained from the bonds sold at the auction. Yield-to-maturity, price, and each cash flow (coupons and principal) are calculated for the total number of bonds sold at the auction.

Weighted-average yield, or interchangeably, bond auction weighted-average yield: A yield-to-maturity calculated from all cash flows obtained from the bonds sold at the auction and against the total price paid to acquire them. Price and each cash flow (coupons and principal) are calculated for the total number of bonds sold at the auction.

**YTM**, or interchangeably, **yield-to-maturity:** The interest rate that creates the present value of cash flows obtained from holding a bond equal to the price of the bond. The YTM factors in coupon income and any capital gain (loss) the investor will realise by holding the bond to maturity. It also takes into consideration the timing of coupon payments and principal repayment, which can be done at the maturity date (for a bullet bond) or in accordance with an amortisation schedule (amortisation bond). The YTM uses an interest-on-interest principle, assuming that coupon income can be reinvested at an interest rate equal to the YTM, and is calculated in accordance with the Ukraine's domestic bond market standard, which is represented by the following formula:

$$Price + AI = \sum_{i=1}^{n} \frac{CF_i}{(1+YTM)^{\frac{t_i}{365}}}$$

where *Price* and *AI* are clean price and accrued interest of the bond, respectively, as of the date of purchase; n is the number of cash flows to be obtained by a bond holder;  $CF_i$  is the

cash flow (coupon income, principal repayment) obtained from a bond;  $t_i$  is the number of days between a purchase date and *i*-th cash flow date, and *YTM* is yield-to-maturity.

**YTW**, or interchangeably, **yield-to-worst:** The same as yield-to-maturity (YTM); however, it is calculated assuming the worst-case scenario under the terms of a bond issue, e.g., the cash flow is trimmed to the earliest possible bond redemption such as due to a call or a put option, embedded into the bond.

#### **ANALYST CERTIFICATION**

This research publication has been prepared by the analyst(s), whose name(s) appear on the front page of this publication. The analyst(s) hereby certifies that the views expressed within this publication accurately reflect her/his own views about the subject financial instruments or issuers and no part of her/his compensation was, is, or will be directly or indirectly related to the inclusion of specific recommendations or views within this research publication.

#### EQUITY RATING DEFINITIONS

Buy: Forecasted 12-month total return greater than 20%

- Hold: Forecasted 12-month total return 0% to 20%
- Sell: Forecasted 12-month total return less than 0%

Note: total return is share price appreciation to a target price in relative terms plus forecasted dividend yield.

#### **DEBT RATING DEFINITIONS**

Buy: Forecasted 12-month total return significantly greater than that of relevant benchmark

- Hold: Forecasted 12-month total return is in line with or modestly deviates from relevant benchmark
- Sell: Forecasted 12-month total return significantly less than that of relevant benchmark
