Bond Market Insight

Weekly review: Negative anticipations

TUESDAY, 22 JULY, 2014

Last week, Ukraine was under a new wave of negative impacts arising from an escalation of the turmoil in eastern Ukraine. The airliner crash caused extreme political chaos which surprisingly had little impact on the capital markets.

Domestic bond market. Domestic liquidity rose significantly at the end last week following a period of remarkable stability amidst minimal volatility. Although the NBU issued UAH5.24bn of 3-month loans to provide support, this increase ironically did not force banks to participate in the unscheduled primary auction last Friday which was cancelled due to low demand. Keep in mind that the MoF did not need to refinance repayments last week as only interest repayments were scheduled.

Eurobond market. Yields of Ukrainian Eurobonds rose slightly last week due to the increase in benchmark yields and spread widening. The widening in spreads arising from negative developments in the situation in eastern Ukraine dwarfed any potential reaction to developments of the IMF mission that took place last week.

Market update and news

Broader banking sector liquidity beat last three year record highs

Liquidity slightly volatile and significantly increases

While through most of last week, broader banking sector liquidity was slightly volatile between UAH43.0bn and UAH44.0bn, this indicator rose last Friday above UAH48.24bn, the new record high since the beginning of 2012. This increase was caused by the NBU's issuance of UAH5.24bn in 3-month loans to 21 banks last Wednesday at an additionally held refinancing tender. Most likely, the funds were transferred to banks last Thursday, causing an increase in last Friday's published indicators.

Other indicators also rose to new records

After being volatile at about UAH29.0bn, banks' correspondent accounts with the NBU rose UAH3.63bn to UAH32.58bn last Friday, less significantly than the loans issued by the NBU on the same day that bolstered total CDs outstanding by UAH1.20bn to UAH12.28bn. These two indicators set new record highs, namely monthly and yearly, respectively.

Banks' correspondent accounts NBU CDs Govt debt repayments next 30 days (UAHbn 50.0

Sources: MoF, NBU, Investment Capital Ukraine LLC

During this week, UAH4.25bn of funds are expected to be repaid to the NBU on earlier issued loans, UAH1.90bn were repaid yesterday, UAH0.92bn should be repaid today, and UAH1.43bn is due on Friday. It looks like the NBU issued refinancing last week to support banking sector liquidity with funds prior to these redemptions and also prior to the period of month-end tax payments that began yesterday. As a consequence, banking sector liquidity could decline both this week and next week, without support from the regulator.

The MoF is scheduled to make some repayments this week, but debt repayments will be mostly denominated in FX, and local currency injections in liquidity should amount to UAH0.60bn if the MoF will not refinance these repayments

Last week's primary auctions

No support, low liquidity caused low demand for the auction ...

Large loan redemptions

scheduled this week

In anticipation of upcoming secondary market trading of the new VAT-bonds issued two weeks ago, combined with a slight decline of banking sector liquidity last Tuesday for the second consecutive business day, market demand has tightened. Moreover, with no domestic QE support, there were no large bids.

...submitted only for two bonds

Of the four bonds offered with maturities ranging from 2.5 months to five years, demand was submitted only for 6-month and 2-year bonds. Both bonds received only one bid at the same volume of UAH20.0m, possibly indicating demand from one bidder, at interest rates relatively unchanged from last week's auction.

Last Tuesday yields slightly declined...
 The bid for the 2-year bond was submitted at 16.75%, unchanged from the last unscheduled auction a week before but 20bp below the cut-off interest rate at last similar auction which indicated market demand as the maturity was slightly longer. The 6-month bond was submitted at 14.90%, down 5bp from last week when the similar bond was sold, but with a 5-month maturity. It appears that the MoF anticipated lower interest rates, particularly due to the decline in interest rates for 2-year bonds, as it rejected the bid for the 6-month bond.
 ...but last Friday yields

slightly rose, causing the auction to be canceled

The MoF's unscheduled additional primary auction of three bonds with maturities from 75 days to five years failed on Friday. Because of insufficient demand and higher interest rates, the auction was cancelled.

The 75-day bond received two bids for a total of UAH40.0m at interest rates of 13.5-14.0%, the 9-month bond receive just one bid for UAH20.0m at 15.9%, and the 5-year bond received no bids. The interest rate for the 9-month bond was up 100bp to 15.9% versus 14.9% on the 6-month bond sold last Tuesday, and the interest rate for the 75-day bond was 150-200bp higher than the rate bid for the 84-day bond sold the week before. The increase in interest rates could be a reaction to the increase in the NBU's discount rate and in refinancing rates that occurred earlier in the week. However, the MoF most likely refused these bids due to the low volume of demand.

This week, the MoF now plans to hold two auctions rather than just the single auction on Tuesday originally scheduled that will offer local currency bonds. In preparation for a scheduled FX-denominated bond redemption, the MoF will offer FX-denominated bonds in an additional auction on Wednesday with an extended set of bonds.

Eurobond market

YTMs increase on negative news and a benchmark increase

YTMs of Ukrainian Eurobonds rose last week, but not significantly. However, of note, last Friday the YTM of UKRAIN 6.875% '15 rose above 9.0%. Yields rose due to two main reasons. On the one hand, YTMs of US Treasuries rose till last Wednesday and the spread tightening was insufficient. But later last week, spreads widened on political situation and situation at eastern Ukraine. At the same time, news about the IMF mission which should be positive, did not have any impact on Eurobonds markets.

Appendixes

The following pages contain tabular information on the local fixed-income market. There are tables that detail government debt repayments such as a weekly schedule for current year and quarterly schedule for next 5 years.

Table 7. Foreign-currency debt* (Eurobonds and loans) repayments for the upcoming 5-year period

Notes: [*] debt redemptions include also interest payments; debt comprises Eurobonds, IMF and VTB loans; IMF loan is meant all tranches received in 2008-10; [1] redemption of US\$2bn loan to VTB is a worst-case scenario within this loan agreement, it may be prolonged 2 times and this in effect may shift the redemption to 4Q11 or 2Q12. Sources: Ministry of Finance, IMF, Bloomberg, Reuters, Investment Capital Ukraine LLC.

Glossary

The following is the list of terms, phrases and abbreviations that are frequently used in this report's weekly publications.

Average duration, or interchangeably, **bond auction average duration**: Duration calculated from all cash flows obtained from the bonds sold at the auction. Yield-to-maturity, price, and each cash flow (coupons and principal) are calculated on a per-bond basis.

Average yield, or interchangeably, **bond auction average yield**: A yield-to-maturity calculated from all cash flows obtained from the bonds sold at the auction and versus the total price paid per bond to acquire them. Price and each cash flow (coupons and principal) are calculated on a per-bond basis.

Basis point, or interchangeably, bp: One-hundredth of a percentage point, or 0.01%.

BoP: Balance of payments.

Certificate(s) of Deposit, or interchangeably, **CD(s):** Short-term money market instruments that allow the NBU, the central bank, to absorb excess liquidity from the local banks. Their durations are 2, 3, or up to 5 days; two weeks; one month; 1.5 months; two months; and up to three months.

CDS: A Credit default swap; a contract that references the performance of a loan or a bond (sovereign, corporate, or municipal). A CDS is normally quoted in basis points, or hundredths of a percent.

CRA: Credit rating agency. These include international industry majors Moody's, Standard & Poor's, and Fitch. It could refer also to other credit rating agencies, including Credit-Rating of Ukraine.

EFSF: European Financial Stability Facility (http://www.efsf.europa.eu), created on 9 May, 2010 by the euro area member states, as a Luxembourg-registered company owned by Euro Area Member States (EAMS), which has a mandate to lend to the EAMS in times of difficulty, e.g., in bail-outs. For the purpose of its operations, the EFSF is able to issue bonds EAMS-guaranteed for up to €440bn. Thanks to its structure of credit enhancements, including a cash reserve and a loan-specific cash buffer¹, the EFSF has top credit ratings from major CRAs: 'Aaa' by Moody's, 'AAA' by S&P, and 'AAA' by Fitch.

MoE: Ministry of Economy of Ukraine (http://www.me.gov.ua).

MoF: Ministry of Finance of Ukraine (http://www.minfin.gov.ua).

NBU: National Bank of Ukraine, the central bank of Ukraine (http://www.bank.gov.ua).

Party of Regions, or interchangeably, **PoR:** The *de facto* ruling political party in Ukraine currently. It won the presidency in the February 2010 presidential elections with a slim margin over Yulia Tymoshenko's Bloc, then consolidated power in the parliament, where it has a majority over minor loyal factions, while incapable of forming a majority itself. The next elections for Parliament and the president's office are expected to take place in 2012 and 2015, respectively.

¹ For instance, in order to lend €17.7bn to Ireland, the EFSF has to raise around €26.5bn from the financial market.

Percentage point, or interchangeably, ppt: one percent, 1%.

Recaps, or interchangeably, **recapitalisation bonds:** Local-currency bond(s), representing a general financial obligation by the government on par with other government's financial obligations, which was/were issued with the purpose of recapitalising state-owned entities like Naftogaz of Ukraine, commercial banks from Ukreximbank to Oschadbank, and the State Mortgage Institution (SMI).

UAH: Ukrainian national currency, the hryvnia.

UAH TWI, or interchangeably, **hryvnia trade-weighted index:** Index of the local currency calculated by Investment Capital Ukraine (ICU), which is calculated upon nominal exchanges rates to the US dollar and headline consumer price inflation indices of Ukraine and its 26 trading partners, which as a whole, comprise a 76% share of merchandise trade turnover. Please refer to *ICU Quarterly Report* "Ukraine's See-saw Puzzle" published on 14 July, 2009 for more details on the methodology of the index. There are nominal and real UAH TWIs, the former based on exchange rates, and the latter based on both exchange rates and inflation. There are monthly and daily UAH TWIs, which are tracked by ICU. Monthly TWI calculation is based on the monthly data for inflation and trade statistics as well as monthly average exchange rates. Daily TWI calculation is based on the monthly data for inflation and trade statistics; however, its core substance is to reflect daily movements of the exchange rates of Ukraine's currency as well as of its key trading partners.

UAS: Ukrainian accounting standards.

VATs, or interchangeably, **VAT bonds**: Local-currency bond(s), representing a general financial obligation by the government on par with other government's financial obligations, which was/were issued in accordance with the government's initiative to offload the government's accumulated arrears on VAT refunds to domestic exporters.

Weighted-average duration, or interchangeably, bond auction weighted-average duration: Duration calculated from all cash flows obtained from the bonds sold at the auction. Yield-to-maturity, price, and each cash flow (coupons and principal) are calculated for the total number of bonds sold at the auction.

Weighted-average yield, or interchangeably, bond auction weighted-average yield: A yield-to-maturity calculated from all cash flows obtained from the bonds sold at the auction and against the total price paid to acquire them. Price and each cash flow (coupons and principal) are calculated for the total number of bonds sold at the auction.

YTM, or interchangeably, **yield-to-maturity:** The interest rate that creates the present value of cash flows obtained from holding a bond equal to the price of the bond. The YTM factors in coupon income and any capital gain (loss) the investor will realise by holding the bond to maturity. It also takes into consideration the timing of coupon payments and principal repayment, which can be done at the maturity date (for a bullet bond) or in accordance with an amortisation schedule (amortisation bond). The YTM uses an interest-on-interest principle, assuming that coupon income can be reinvested at an interest rate equal to the YTM, and is calculated in accordance with the Ukraine's domestic bond market standard, which is represented by the following formula:

$$Price + AI = \sum_{i=1}^{n} \frac{CF_i}{(1+YTM)^{\frac{t_i}{365}}}$$

where *Price* and *AI* are clean price and accrued interest of the bond, respectively, as of the date of purchase; n is the number of cash flows to be obtained by a bond holder; CF_i is the

cash flow (coupon income, principal repayment) obtained from a bond; t_i is the number of days between a purchase date and *i*-th cash flow date, and *YTM* is yield-to-maturity.

YTW, or interchangeably, **yield-to-worst:** The same as yield-to-maturity (YTM); however, it is calculated assuming the worst-case scenario under the terms of a bond issue, e.g., the cash flow is trimmed to the earliest possible bond redemption such as due to a call or a put option, embedded into the bond.
