Bond Market Insight

Weekly review: New bond offerings, political situation stabilizes

TUESDAY, 5 AUGUST, 2014

Last week was marked by high volatility. On the one hand, the MoF issued two new domestic bonds, one of military bonds and the other was the second tranche of VAT bonds. On the other hand, the Eurobond market reacted to political instability and approved parliament's vote of confidence for the new PM who had offered his resignation amidst voting stalemates.

Domestic bond market. The MoF issued the second tranche of VAT bonds last Monday. As the offering was less than the maximum volume approved by the Cabinet of Ministers, the MoF can issue a third tranche. Also, at last week's debut offering of military bonds, the MoF sold only a small amount of funds to finance the Ukrainian army.

Domestic liquidity was volatile and declined significantly last week due to low injections and high pressure from month-end tax payments. Moreover, there was a significant reallocation of funds from CDs to banks' correspondent accounts with the NBU.

Eurobond market. Ukrainian Eurobonds were slightly volatile last week with significant increase of short-term end of the yield curve increased significantly. Following the government's resignation, the UKRAIN 6.875% '15 YTM rose above 10.0% only to decline significantly afterward. Although spreads to the benchmark tightened following the PM's resuming leadership, spreads widened even further than they did the week prior.

Market update and news

Domestic bond market

Liquidity declines due to tax payments

Liquidity significantly declined due to tax payments

Broader banking sector liquidity significantly declined last week. It began the week at UAH48.59bn, declined to UAH42.19bn through Wednesday, and recovered slightly to UAH42.59bn at yesterday's close. In broader liquidity, significant funds were reallocated from CDs to banks' correspondent accounts and back to CDs, especially during the last two days of last week. Banks' correspondent accounts with the NBU declined after tax payments to UAH24.86bn last Thursday, while they received UAH1.26bn in CD redemptions and UAH1.98bn in debt repayments, while the NBU attracted only UAH0.93bn in budget proceeds last Wednesday. Other outflows were caused mostly by month-end tax payments.

The decline of made less severe by NBU injections via CD redemptions and ON loans The NBU tried to support liquidity via CD redemptions and ON loans as it decreased CDs outstanding by UAH4.47bn to UAH10.80bn through last Friday as it issued UAH0.58bn of ON loans last Thursday. These injections supported liquidity, preventing another consecutive daily decline, causing banks' correspondent accounts with the NBU to recover to UAH28.41bn last Friday (please see the left-hand chart below).

As banks have to repay loans to the NBU, liquidity could decline yet again This week we will see significant inflows in liquidity and also significant outflows from NBU loan repayments. The NBU's scheduled repayments of CDs for this week amount to UAH10.27bn (including yesterday's UAH4.62bn repayment) and only UAH0.48bn of debt repayments in local currency. At the same time, banks have to repay UAH0.88bn of loans today in addition to UAH2.57bn on Friday which will be included in NBU statistics next Monday.

Last week's primary auctions

The MoF held three auctions last week including an offering of military bonds The MoF held three primary auctions last week, including one offering of military bonds last Thursday. All three auctions attracted demand and provided the MoF with a portion of funds, but mostly bids were supported by the NBU, most likely as some funds were provided from the bond market as the NBU's portfolio decline was insignificant last week despite the large principal repayment.

Tuesday's auction provided low market demand for some bonds...

The MoF offered four bonds with maturities from nine months to five years at last Tuesday's primary auction. All of them, excluding the 5-year bond received moderate market demand. Of the five bids that attracted UAH120.32m in total demand, the MoF accepted only three. It rejected two bids for a total of UAH20.00m at 16.50% for the 12-month bond, based on low volume and a high interest rate (which was only 25bp lower than that for the 2-year bond). The 2-year bond sold UAH65.32m (par value) at 16.75% and the 9-month bond sold UAH35.00m at the routine 15.90%. In sum, the auction raised UAH97.18m in budget proceeds.

...while last Wednesday we saw likely demand supported by domestic

QE

QE

As the MoF was scheduled to repay a significantly higher UAH1.98bn (including UAH1.67bn of principal repayments) in local currency and UAH161.33m in FX, last Thursday the MoF held an additional primary auction to offer the same bonds as it did last Tuesday. At this auction, demand was submitted for the 9-month and 12-month bonds, for UAH0.50bn and UAH0.45bn (par value), respectively. Each bond received one large bid which was accepted by the MoF. Due to the large bid sizes, demand was most likely supported by the NBU via domestic QE or from some investors who refinanced their received funds.

Small amount of military bonds was sold at last Thursday's auction Last Thursday the MoF held a third auction, but this time offering only one 2-year "military bond" to raise funds for the Ukrainian army. The MoF sold UAH50.0m of these bonds to one investor who submitted a bid for the bonds at a 7.0% rate.

This week we could see a new portion of domestic

This week's auction likely oriented on domestic QE support, as the MoF has to repay just UAH0.48bn in local currency, but will offer today mostly long-term bonds. The shortest one will be 2-year bond, while also will be offered 5-year and 7-year bonds which did not see market demand yet.

Second tranche of VAT bonds issued

The MoF issued the second tranche of UAH2.17bn in VAT bonds for 199 tax payers this Monday under the same conditions as debut offering, with semi-annual amortisation and coupon payments at a 9.50% rate.

As the second tranche did not offer the highest volume permitted, there could be a third offering if the Ministry of Taxation provides the MoF with a registry of tax payers who will receive the remainder of the full balance.

Eurobond market

Slight volatility on negative anticipations

Political instability caused YTMs to increase last week...

Ukrainian Eurobonds were slightly volatile last week with significant increase of short-term end of the yield curve increased significantly. Following the government's resignation, the UKRAIN 6.875% '15 YTM rose above 10.0% only to decline significantly afterward. Although spreads to the benchmark tightened following the PM's resuming leadership, spreads widened even further than they did the week prior.

...while this week it could not have any impact on Eurobonds YTMs

Lack of information regarding the second tranche of the IMF loan for Ukraine and ongoing political instability in eastern Ukraine continued to bolster negative sentiment on Ukraine's ability to repay debt,. The shortest term bonds are under the main pressure, making them the most risky. This week, we could see spreads widen as YTMs increase due to the above-mentioned reasons.

Appendixes

The following pages contain tabular information on the local fixed-income market. There are tables that detail government debt repayments such as a weekly schedule for current year and quarterly schedule for next 5 years.

Glossary

The following is the list of terms, phrases and abbreviations that are frequently used in this report's weekly publications.

Average duration, or interchangeably, **bond auction average duration**: Duration calculated from all cash flows obtained from the bonds sold at the auction. Yield-to-maturity, price, and each cash flow (coupons and principal) are calculated on a per-bond basis.

Average yield, or interchangeably, **bond auction average yield**: A yield-to-maturity calculated from all cash flows obtained from the bonds sold at the auction and versus the total price paid per bond to acquire them. Price and each cash flow (coupons and principal) are calculated on a per-bond basis.

Basis point, or interchangeably, bp: One-hundredth of a percentage point, or 0.01%.

BoP: Balance of payments.

Certificate(s) of **Deposit**, or interchangeably, **CD(s):** Short-term money market instruments that allow the NBU, the central bank, to absorb excess liquidity from the local banks. Their durations are 2, 3, or up to 5 days; two weeks; one month; 1.5 months; two months; and up to three months.

CDS: A Credit default swap; a contract that references the performance of a loan or a bond (sovereign, corporate, or municipal). A CDS is normally quoted in basis points, or hundredths of a percent.

CRA: Credit rating agency. These include international industry majors Moody's, Standard & Poor's, and Fitch. It could refer also to other credit rating agencies, including Credit-Rating of Ukraine.

EFSF: European Financial Stability Facility (http://www.efsf.europa.eu), created on 9 May, 2010 by the euro area member states, as a Luxembourg-registered company owned by Euro Area Member States (EAMS), which has a mandate to lend to the EAMS in times of difficulty, e.g., in bail-outs. For the purpose of its operations, the EFSF is able to issue bonds EAMS-guaranteed for up to €440bn. Thanks to its structure of credit enhancements, including a cash reserve and a loan-specific cash buffer¹, the EFSF has top credit ratings from major CRAs: 'Aaa' by Moody's, 'AAA' by S&P, and 'AAA' by Fitch.

MoE: Ministry of Economy of Ukraine (http://www.me.gov.ua).

MoF: Ministry of Finance of Ukraine (http://www.minfin.gov.ua).

NBU: National Bank of Ukraine, the central bank of Ukraine (http://www.bank.gov.ua).

Party of Regions, or interchangeably, **PoR:** The *de facto* ruling political party in Ukraine currently. It won the presidency in the February 2010 presidential elections with a slim margin over Yulia Tymoshenko's Bloc, then consolidated power in the parliament, where it has a majority over minor loyal factions, while incapable of forming a majority itself. The next elections for Parliament and the president's office are expected to take place in 2012 and 2015, respectively.

23

¹ For instance, in order to lend €17.7bn to Ireland, the EFSF has to raise around €26.5bn from the financial market.

Percentage point, or interchangeably, ppt: one percent, 1%.

Recaps, or interchangeably, **recapitalisation bonds**: Local-currency bond(s), representing a general financial obligation by the government on par with other government's financial obligations, which was/were issued with the purpose of recapitalising state-owned entities like Naftogaz of Ukraine, commercial banks from Ukreximbank to Oschadbank, and the State Mortgage Institution (SMI).

UAH: Ukrainian national currency, the hryvnia.

UAH TWI, or interchangeably, **hryvnia trade-weighted index:** Index of the local currency calculated by Investment Capital Ukraine (ICU), which is calculated upon nominal exchanges rates to the US dollar and headline consumer price inflation indices of Ukraine and its 26 trading partners, which as a whole, comprise a 76% share of merchandise trade turnover. Please refer to *ICU Quarterly Report* "Ukraine's See-saw Puzzle" published on 14 July, 2009 for more details on the methodology of the index. There are nominal and real UAH TWIs, the former based on exchange rates, and the latter based on both exchange rates and inflation. There are monthly and daily UAH TWIs, which are tracked by ICU. Monthly TWI calculation is based on the monthly data for inflation and trade statistics as well as monthly average exchange rates. Daily TWI calculation is based on the monthly data for inflation and trade statistics; however, its core substance is to reflect daily movements of the exchange rates of Ukraine's currency as well as of its key trading partners.

UAS: Ukrainian accounting standards.

VATs, or interchangeably, **VAT bonds:** Local-currency bond(s), representing a general financial obligation by the government on par with other government's financial obligations, which was/were issued in accordance with the government's initiative to offload the government's accumulated arrears on VAT refunds to domestic exporters.

Weighted-average duration, or interchangeably, **bond auction weighted-average duration**: Duration calculated from all cash flows obtained from the bonds sold at the auction. Yield-to-maturity, price, and each cash flow (coupons and principal) are calculated for the total number of bonds sold at the auction.

Weighted-average yield, or interchangeably, **bond auction weighted-average yield:** A yield-to-maturity calculated from all cash flows obtained from the bonds sold at the auction and against the total price paid to acquire them. Price and each cash flow (coupons and principal) are calculated for the total number of bonds sold at the auction.

YTM, or interchangeably, yield-to-maturity: The interest rate that creates the present value of cash flows obtained from holding a bond equal to the price of the bond. The YTM factors in coupon income and any capital gain (loss) the investor will realise by holding the bond to maturity. It also takes into consideration the timing of coupon payments and principal repayment, which can be done at the maturity date (for a bullet bond) or in accordance with an amortisation schedule (amortisation bond). The YTM uses an interest-on-interest principle, assuming that coupon income can be reinvested at an interest rate equal to the YTM, and is calculated in accordance with the Ukraine's domestic bond market standard, which is represented by the following formula:

$$Price + AI = \sum_{i=1}^{n} \frac{CF_i}{(1+YTM)^{\frac{t_i}{365}}}$$

where Price and AI are clean price and accrued interest of the bond, respectively, as of the date of purchase; n is the number of cash flows to be obtained by a bond holder; CF_i is the

cash flow (coupon income, principal repayment) obtained from a bond; t_i is the number of days between a purchase date and i-th cash flow date, and YTM is yield-to-maturity.

YTW, or interchangeably, **yield-to-worst:** The same as yield-to-maturity (YTM); however, it is calculated assuming the worst-case scenario under the terms of a bond issue, e.g., the cash flow is trimmed to the earliest possible bond redemption such as due to a call or a put option, embedded into the bond.
